Office Relocation

Most of our regular contacts and clients will, by now, be aware that in January 2010 we announced the relocation of our main office to Dorset.

Over the last year or so we have been offering services from both our original office in Sutton Coldfield West Midlands and The Isle of Purbeck in Dorset.

We have now transferred our main base to Dorset, but continue to undertake projects in the West Midlands where we have many long established relationships, together with other areas throughout the country. With modern day communications, distances become less critical to the location of our projects. In the last few years we have also worked on projects in the Midlands, Devon, Berkshire, Essex, and The Channel Islands, as well as developing our work in the Dorset Area. Relocation to Dorset also means that we are better placed to serve the South Coast, and South West areas.

Current and Recently Completed Projects

A glimpse at the following list will give you an insight to the level of our recently completed and current projects.
